DEALER IN
CACTUS--DESERT PLANTS

E. C. DASYCANTHUS — A handsome plant with large yellow blossoms, single plant, 35c; clusters, \$1.00.

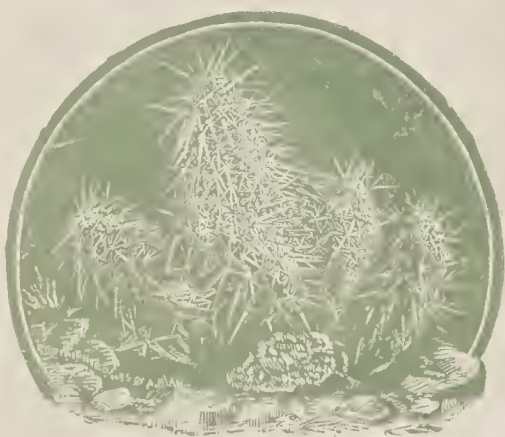

E. C. CLORANTHUS — A very pretty variety that has spines of several colors; has a greenish-brown blossom, 35c to \$1.00.

MAM. HEYDERRII — A flat growing variety, good bloomer, followed with red seed pods that stays on for many months, 35c to 75c.

DEAR READERS:

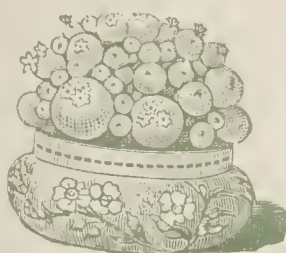

I have been in the cactus business eight years and hope to continue. To do so I must give satisfaction, which I sincerely try to do. If at any time you get plants from me and are not satisfied, kindly let me know what is wrong and if it is any fault of mine I will gladly adjust things. If satisfied, please tell others.

E. C. STRAMINEUS — A cactus that grows in clusters; has long straw colored spines, 35c to \$1.00.

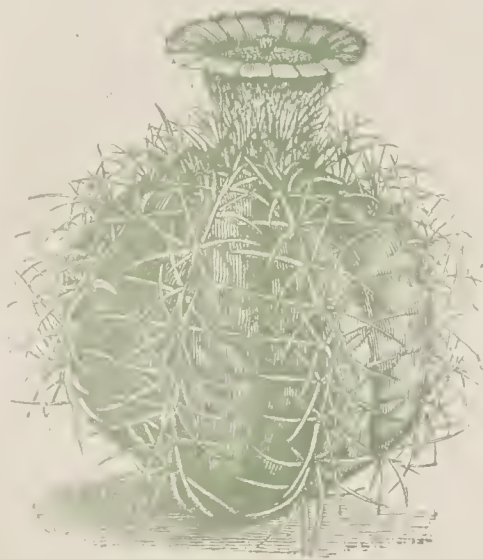

E. UNCINATUS — A very handsome decorative plant; has long hooked spines and orange colored blossoms, 50c to \$1.50.

MAM. MICROMERIS — What we call the button cactus; has soft white spines, very dainty blossoms, 10c to 25c.

E. C. POLYCANTHUS — A large cluster variety. You will be delighted to have a specimen of this variety with its scarlet blossoms which bloom in May and June, 50c to \$1.50.

E. HORIZONTHALONIUS — One of the most attractive varieties; has pink blossom and very hardy, 25c to 50c.

MAM. TUBERCULOSA — A fine showy plant; grows to about four inches in height. Pretty blossoms and red seed pods, 25c to 50c.

WE HANDLE YOUR MAIL ORDERS CAREFULLY AND PROMPTLY

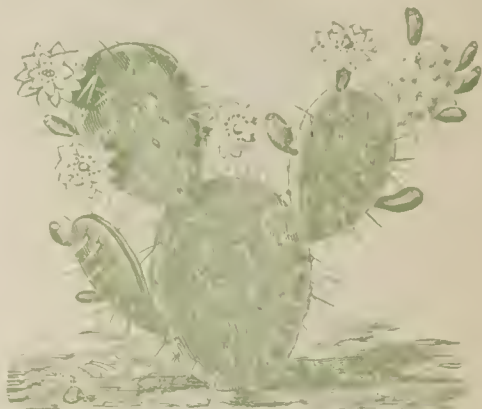

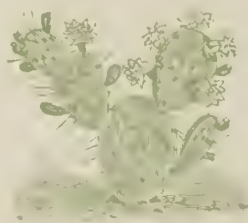

(OVER)

A FEW HINTS ON CARING FOR CACTUS

Be sure and do not water too much. About every ten days is often enough; also give good drainage, as much sunshine as possible. Cactus seem to grow in many different kinds of soil. Sandy loam is good; do not use manure.

MAM. MACROMERIS — A cluster variety that has purple blossoms, 35c to \$1.00.

OPUNTIAS — We have several kinds which no cactus lover should be without, they are very hardy, 25c to \$1.00.

DASYLIRON SERRAFOLIA — Is just what you want for your rock garden; a most attractive plant. Small plants, 50c to \$2.50.

ANHALONIUM FISSURATUM — Is what we call a Living Rock; it looks like a carved rock, has no spines, a flat growing variety that has a pink blossom, 35c to 50c.

OCCATILLOS — One of the choice desert plants; has red blossom spikes in spring, grows in bush form. One to 10 feet high; price, 25c to \$1.00.

CENTURY PLANTS — Blooms just once every century; a most wonderful plant, 50c to \$2.00.

CEREUS GREGGII — A night blooming cactus, very much different from other plants listed, \$1.00 each.

AGAVA LECHUGUILLA — A beautiful evergreen plant, very hardy. Price, 25c to \$1.00.

RESURRECTION PLANT — The most wonderful of plants I believe. It can be left out of soil indefinitely and then put the roots in water and it will come to life; looks like a fern, can be taken out of water and put away. Repeat at any time. I have poured boiling water over dry plants and they get green and open up in a few minutes. Nice to put around a Lily Pool or in a bowl. Price 10c, 3 for 25c.
